

## The Added Benefits of J-Tear Protection

Carlisle SynTec Systems' & Nashville Ponds fish-friendly AquaTough™ rubber pond liners combine design flexibility, long-term durability and easy installation, making them an ideal choice for a variety of waterscape applications. And amongst top competitors, Carlisle brand pond liners are the only brand that will give you the added benefit of J-Tear protection.

### ABOUT CARLISLE SYNTAC SYSTEMS

Carlisle SynTec Systems, headquartered in Carlisle, PA, has been manufacturing single-ply EPDM membranes for more than half a century. With long term aesthetics, durability and flexibility, Carlisle's fish-friendly pond liners provide a high-performance, eco-friendly option for virtually any landscaping or pond lining application. Backed by Carlisle's proven track record of quality, innovation and technical expertise, Carlisle pond liners provide you with peace of mind, knowing your backyard oasis will be protected for years to come.

J-TEAR TEST  
COMPARISON  
VIDEO

When the J-Tear test is successful the sheet will tear in the direction of the cut for a short distance and then it will change direction and attempt to curve back on itself—as it does with the Carlisle SynTec AquaTough Rubber Pond Liners.

This direction change is important during the membrane installation process. As the installer works around protrusions, the J-tear stops the membrane from tearing as they install the sheet. Or, as you can see with the competitor's membrane, the tear will continue down the length of the membrane.
